

COVID-19 Update

To the Constituents of the Cow Creek Groundwater Conservation District:

The Cow Creek Groundwater Conservation District has been regularly monitoring local, state and national updates regarding the COVID-19 virus and the recommended public health best practices for limiting the spread of the virus. Given the latest reports and health emergency declarations from the State of Texas, City of Boerne, and Kendall County the Cow Creek Groundwater Conservation District (CCGCD) staff will be working remotely. Additionally, the District will not hold any public meetings during that time as well.

Please know that we are still receiving and responding to emails and doing as much CCGCD business as possible while we safely protect our constituents, staff and the general public by reducing group interactions. We will continue to monitor public health reports and recommendations and will make future business decisions based on the guidance provided by public health officials. We will keep you informed of all those decisions.

If you need to submit a well registration or a drilling application, please use the drop box on the front of the building. Forms are also available on our website that can be emailed to us. <http://ccgcd.org/forms/>

If you need assistance, please call 830-446-9782 to contact the General Manager directly.

Thank you for your understanding as we all work through this unique public health challenge together.
