

9th Annual TEXAS HYDRO~GEO WORKSHOP

Oct 4-6, 2024

Aquatic biology, hydrology, geology, and environmental science

Over 35 modules on a wide range of field data collection methods

- How to collect water, soil, and rock samples
- Calibrate and utilize field instruments
- Work with soil probes and water wells
- Perform surface and borehole geophysics
- Perform tracer (dye) testing
- Discharge gaging of surface streams
- Collect and identify aquatic biologic material
- Use GIS field mapping applications
- Karst feature evaluation
- Collect water level measurements
- And much more

Keynote speaker

Cynthia Delaney Palomares, P.G.,P.E.

See her full bio on our web.

The Keynote takes place in Cave Without a Name.

For students, practitioners, and academics

The Workshop provides the opportunity to work with leading researchers and practitioners from across the state and the nation for collecting, processing, and analysis of field data.

Location and lodging

Camping sites are provided as part of the registration fee at [Cave Without a Name](#),

325 Kruetzberg Road, Boerne, Texas
